"In light of the fast-evolving market dynamics, we maintained prudent operations in our cash credit business in the fourth quarter, closing out 2021 with steady performance. We generated approximately RMB3.0 billion of transactions from our loan book business with stable asset quality during the fourth quarter," said Mr. Min Luo, Founder, Chairman and Chief Executive Officer of Qudian. "With respect to WLM KIDS, we decided to significantly downsize the business after cautiously re-evaluating the impact of recurrent pandemic outbreaks and regulations concerning the education industry. We believe this decision is in the best interest of the Company and our shareholders. We will continue to closely monitor the shifting regulatory environment and remain vigilant in our credit loan business operations as we strive to bolster the long-term sustainability of our business."

"During the fourth quarter, we remained dedicated to controlling credit risk and continued to shift toward high-quality borrowers. As a result, we have stabilized our D1 delinquency rate[4] at approximately 5% as of the end of February 2022. Looking ahead, supported by our robust balance sheet, we are well-positioned to safeguard the interests of our shareholders and stay flexible in our strategic adjustments," said Ms. Sissi Zhu, Vice President of Investor Relations of Qudian.

- [4] "D1 delinquency rate" is defined as (i) the total amount of principal and financing service fees that became overdue as of a specified date, divided by (ii) the total amount of principal and financing services fees that was due for repayment as of such date, in each case with respect to our loan book business.

Use of Non-GAAP Financial Measures

We use adjusted net income/loss, a Non-GAAP financial measure, in evaluating our operating results and for financial and operational decision-making purposes. We believe that adjusted net income/loss helps identify underlying trends in our business by excluding the impact of share-based compensation expenses, which are non-cash charges, and convertible bonds buyback income. We believe that adjusted net income/loss provides useful information about our operating results, enhances the overall understanding of our past performance and future prospects and allows for greater visibility with respect to key metrics used by our management in its financial and operational decision-making.

Adjusted net income/loss is not defined under U.S. GAAP and are not presented in accordance with U.S. GAAP. This Non-GAAP financial measure has limitations as analytical tools, and when assessing our operating performance, cash flows or our liquidity, investors should not consider them in isolation, or as a substitute for net loss / income, cash flows provided by operating activities or other consolidated statements of operation and cash flow data prepared in accordance with U.S. GAAP.

We mitigate these limitations by reconciling the Non-GAAP financial measure to the most comparable U.S. GAAP performance measure, all of which should be considered when evaluating our performance.

For more information on this Non-GAAP financial measure, please see the table captioned “Unaudited Reconciliation of GAAP and Non-GAAP Results” set forth at the end of this press release.
